

Google Ads launch checklist

Check each item against the actual account and website. A tick means verification evidence exists, not merely an intention to configure it.

Goals and economics

- ☐ Lead, qualified lead and sale are defined and agreed with the team.
- ☐ Acceptable CAC and CPL account for margin and lead-to-sale conversion.
- ☐ Budget, currency and spending stop conditions are approved by the owner.

Keywords and settings

- ☐ Keywords are grouped by intent; match types are chosen deliberately.
- ☐ Negative keywords, locations, languages and schedules are checked.
- ☐ Brand and non-brand demand are separated where analysis requires it.

Ads and the offer

- ☐ Headlines and descriptions are approved; the page supports their claims.
- ☐ Final URLs, additional links and business information are current.
- ☐ No unsupported guarantees, outdated prices or unavailable services remain.

Google Ads launch checklist

Continue the review. Resolve critical issues before launch or expanding the work.

Customer journey

- ☐ The mobile page loads; the offer and next step are clear.
- ☐ Successful form submission is verified; validation failure creates no lead.
- ☐ Phone numbers, messengers and lead routing are verified by the team.

Measurement

- ☐ Primary conversions fit the goal; micro-actions are measured separately.
- ☐ One lead is not counted multiple times; test events are separated.
- ☐ Analytics URLs and parameters contain no names, emails, phones or messages.

Post-launch review

- ☐ An owner, review date and evaluation window are assigned.
- ☐ Reporting links spend to lead quality and CRM sales.
- ☐ Critical issues are resolved; change and rollback plans are recorded.
